This is the 41st Financial Review Rich List, which ranks Australia's 200 wealthiest citizens by their net worth. Valuations are undertaken by the Rich List editors and an analyst and are minimum estimates. They are calculated using publicly available data and private consultation with list members. Listed company valuations are calculated in mid-April. Valuations of private companies are typically determined using profit margins and price-earnings ratios of comparable publicly listed competitors. Taxation and debt levels are taken into account, with any assumptions based on the age, history and industries of the Rich List member. Where valuations are equal, the rankings are in alphabetical order.

For the interactive Rich List, go to [afr.com/rich-list](http://afr.com/rich-list)
